PROFESSIONAL SUMMARY

Agentic AI Engineer and Full-Stack Developer building production-grade AI systems, multi-agent pipelines, and scalable web platforms. Co-founder of an AI-first venture with hands-on experience deploying LLM-powered products for real clients.

Fluent in the Anthropic and OpenAI ecosystems — from RAG architecture to prompt engineering to workflow automation. Builds things that ship.

EXPERIENCE

Patricians Co-Founder Jan 2024 – Present

- Co-founded an AI-first venture building agentic tools and automation systems for SME clients.
- Executed performance-driven social media marketing campaigns on Meta platforms to improve reach, engagement, and conversions.
- Led full-stack development of client-facing products, handling product strategy and technical delivery end-to-end.

Integrity Technologies Agentic AI Intern Sep – Dec 2025

- Designed and deployed RAG pipelines and conversational AI agents for internal knowledge management.
- Integrated LLM APIs with production workflows to automate document processing and client communication.
- Collaborated on prompt engineering strategies that improved response quality and reduced hallucination rates.

Khichik Multimedia Digital Marketing Intern Jun – Dec 2023

- Executed multi-channel digital campaigns, improving organic reach and engagement metrics across platforms.
- Contributed to SEO strategy and content planning resulting in measurable improvement in search rankings.
- Worked cross-functionally with design and content teams to maintain consistent brand communication.
