SUMMARY

Full-stack product engineer building AI-enabled and real-time applications with TypeScript, Next.js, Python, and FastAPI. Co-founder of Patricians with hands-on experience delivering digital products for real clients. Currently building LapSignal — a sim-racing telemetry platform that ingests live F1 UDP telemetry, performs deterministic analytics, and integrates validated LLM coaching.

SELECTED ENGINEERING PROJECTS

 **LapSignal** Independent Project — In Development 2026 – Present

- Built a full-stack sim-racing telemetry platform: Next.js/TypeScript frontend, Node.js/TypeScript UDP telemetry collector, Python/FastAPI analytics backend.
- Ingests and processes live F1 2021 UDP telemetry at ~20 Hz supporting session analysis, lap comparison, track calibration, and live coaching.
- Integrated LLM-assisted coaching using structured outputs, server-side validation, evidence-bounded prompts, and deterministic fallback behavior.
- Developed 120+ automated tests including Playwright end-to-end coverage; validated against real telemetry session data.

Next.js TypeScript Node.js Python FastAPI Playwright LLM APIs

 **Safe Safar**

Privacy-focused platform allowing road users to contact vehicle owners via unique QR identifiers without exposing personal information. Responsive product UI with vehicle lookup and privacy-first UX.

Next.js TypeScript Supabase

 **Pat AI**

AI-powered website assistant using LLM APIs and custom business knowledge for conversational customer support. Integrated OpenRouter for flexible model routing.

Next.js OpenAI OpenRouter

EXPERIENCE

Patricians Co-Founder Jan 2024 – Present

- Co-founded a design and technology studio delivering websites, digital products, and ongoing digital services for clients across multiple industries.
- Lead full-stack product delivery from requirements and solution planning through UI/UX, implementation, deployment, and ongoing iteration, working directly with clients throughout the lifecycle.
- Translate business problems into practical technical and product decisions while managing project scope, proposals, client communication, and delivery across multiple engagements.
- Contribute across business development, digital strategy, SEO, social media, advertising, and emerging AI-enabled product and workflow opportunities alongside core development responsibilities.

Integrity Technologies Agentic AI Intern Sep – Dec 2025

- Built and refined applied-AI prototypes and workflows including conversational assistants, research agents, automated pipelines, and LLM-powered tools.
- Contributed to a voice-based AI cold-calling agent, working on response handling, conversational behavior, performance, and reliability.
- Integrated and evaluated LLM-driven functionality in practical workflows, including prompt design, automation, and response validation.

Khichik Multimedia Digital Marketing Intern Jun – Dec 2023

- Supported Facebook and Instagram advertising campaigns through Meta Ads Manager, gaining hands-on experience with audience targeting, budget management, campaign monitoring, and optimization.
- Collaborated with senior marketers and designers to align creative content with campaign strategy, using performance data to support reach and engagement objectives.
